DETAILED ACTION

Election/Restrictions

1. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claims 17-20 and 24-30, drawn to methods of making a two-phase solution.

Group II, claims 21-23 and 30-31, drawn to an apparatus for making a two-phase solution.

There is no technical feature common for the inventions of Groups I and II as recited in the instant claims. Therefore, the unity of inventions is lacking.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Note that, if elected, the claims of Group I are subject to further restriction since they contain the following patentably distinct species:

Species 1, claims 19 and 25, drawn to a method of making a two-phase solution where cooling is carried out by drawing the uniform solution within the reaction container into a syringe/extractor and cooling the uniform solution outside the reaction container.

Species 2, claims 19 and 26, drawn to a method of making a two-phase solution where cooling is carried out by putting a solid the temperature of which is lower than that of the reaction container, into the uniform solution within the reaction container

Species 3, claims 19 and 27, drawn to a method of making a two-phase solution where cooling is carried out by mixing a compound having a low boiling point directly into the uniform solution within the reaction container.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

2 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to the attorneys of record on 07/21/2010, to request an oral election to the above restriction requirement, but did not result in an election being made.
